# **CD1A Monoclonal Antibody**

Catalog Number: E-AB-22096

Note: Centrifuge before opening to ensure complete recovery of vial contents.

### **Description**

**Reactivity** Human, Mouse, Rat **Immunogen** Synthetic Peptide

**Host** Mouse Isotype IgG

Clone: 2A5

**Purification** Protein A purification

Conjugation Unconjugated

**Formulation** PBS with 0.02% sodium azide and 50% glycerol pH 7.4.

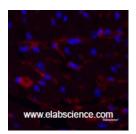

### **Applications** Recommended Dilution

IHC 1:100-1:300 IF 1:50-200

#### Data

Immunohistochemistry of paraffin-embedded Human tonsil tissue using CD1A Monoclonal Antibody at dilution of 1:200.

Immunofluorescence analysis of Mouse heart tissue using CD1A Monoclonal Antibody at dilution of 1:200.

## **Preparation & Storage**

**Storage** Store at -20°C. Avoid freeze / thaw cycles.

#### **Background**

This gene encodes a member of the CD1 family of transmembrane glycoproteins, which are structurally related to the major histocompatibility complex (MHC) proteins and form heterodimers with beta-2-microglobulin. The CD1 proteins mediate the presentation of primarily lipid and glycolipid antigens of self or microbial origin to T cells. The human genome contains five CD1 family genes organized in a cluster on chromosome 1. The CD1 family members are thought to differ in their cellular localization and specificity for particular lipid ligands. The protein encoded by this gene localizes to the plasma membrane and to recycling vesicles of the early endocytic system. Alternatively spliced transcript variants have been observed, but their biological validity has not been determined.
