

## CD4 Monoclonal Antibody

Catalog No. E-AB-22098

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Description

<b>Reactivity</b>	Human,Mouse,Rat
<b>Immunogen</b>	Synthetic Peptide
<b>Host</b>	Mouse
<b>Isotype</b>	IgG
<b>Purification</b>	Protein A purification
<b>Conjugation</b>	Unconjugated
<b>Formulation</b>	PBS with 0.02% sodium azide and 50% glycerol pH 7.4.

### Applications Recommended Dilution

<b>IHC</b>	1:100-1:300
<b>IF</b>	1:50-200

### Data

Immunohistochemistry of paraffin-embedded Human stomach tissue using CD4 Monoclonal Antibody at dilution of 1:200.

Immunohistochemistry of paraffin-embedded Mouse brain tissue using CD4 Monoclonal Antibody at dilution of 1:200.

Immunofluorescence analysis of Mouse colonic tissue with CD4 Monoclonal Antibody.

### Preparation & Storage

**Storage** Store at -20°C. Avoid freeze / thaw cycles.

### Background

This gene encodes a membrane glycoprotein of T lymphocytes that interacts with major histocompatibility complex class

### For Research Use Only

II antigenes and is also a receptor for the human immunodeficiency virus. This gene is expressed not only in T lymphocytes, but also in B cells, macrophages, and granulocytes. It is also expressed in specific regions of the brain. The protein functions to initiate or augment the early phase of T-cell activation, and may function as an important mediator of indirect neuronal damage in infectious and immune-mediated diseases of the central nervous system. Multiple alternatively spliced transcript variants encoding different isoforms have been identified in this gene.
