AKT1 Monoclonal Antibody

Catalog Number:E-AB-22210 1 Publications

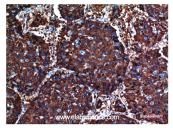

Note: Centrifuge before opening to ensure complete recovery of vial contents.

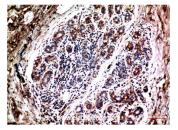

Description	
Reactivity	Human
Immunogen	Synthetic Peptide of AKT1
Host	Mouse
Isotype	IgG
Clone	Clone:10D6
Purification	Protein A purification
Formulation	PBS with 0.02% sodium azide, 0.5% protective protein and 50% glycerol, pH7.4
Applications	Recommended Dilution
WB	1:1000-2000
IHC	1:100-200
Data	

Western Blot analysis of PC3 cells using AKT1 Monoclonal Antibody at dilution of 1:2000. **Observed Mw:60kDa**

Immunohistochemistry of paraffin-embedded Human lung carcinoma tissue using AKT1 Monoclonal Antibody at dilution of 1:200.

Immunohistochemistry of paraffin-embedded Human breast carcinoma tissue using AKT1 Monoclonal Antibody at dilution of 1:200.

Preparation & Storage

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Background

The serine-threonine protein kinase AKT1 is catalytically inactive in serum-starved primary and immortalized fibroblasts. AKT1 and the related AKT2 are activated by platelet-derived growth factor. The activation is rapid and specific, and it is abrogated by mutations in the pleckstrin homology domain of AKT1. It was shown that the activation occurs through phosphatidylinositol 3-kinase. In the developing nervous system AKT is a critical mediator of growth factor-induced

neuronal survival. Survival factors can suppress apoptosis in a transcription-independent manner by activating the serine/threonine kinase AKT1, which then phosphorylates and inactivates components of the apoptotic machinery.
