

A Reliable Research Partner in Life Science and Medicine

### **Luciferase Monoclonal Antibody**

Catalog No. E-AB-22231

*Note:* Centrifuge before opening to ensure complete recovery of vial contents.

### **Description**

Reactivity Firefly

**Immunogen** Synthetic Peptide of Luciferase

**Host** Mouse IgG **Isotype** 

**Purification** Protein A purification

PBS with 0.02% sodium azide, 0.5% protective protein and 50% glycerol, pH7.4 **Buffer** 

**Applications Recommended Dilution** 

WB 1:1000-2000

#### Data

Western Blot analysis of Firefly Luciferase Transfected Hela using Luciferase Monoclonal Antibody at dilution of 1:2000.

Observed Mw:60kDa

# **Preparation & Storage**

Storage Store at -20°C. Avoid freeze / thaw cycles.

## **Background**

Luciferase from the firefly has become one of the more widely used reporter proteins for the study of gene expression. Luciferase catalyzes a bioluminescent reaction which requires the substrate luciferin as well as Mg2+ and ATP. Mixing these reagents with the cell extract containing luciferase, results in a flash of light that decays rapidly. This light can be detected by a luminometer. The total light emission is proportional to the luciferase activity of the sample.
