#### **Antigen Information**

Alternate Names	T-cell surface glycoprotein CD 3epsilon/delta/gamma/zeta chain,CD3E/D/G/Z,CD3e/d/g/z,CD3E/D/G/Z,CD3
Uniprot ID	P04235,P11942,P22646,P24161
Background	CD3, also known as T3, is a member of the Ig superfamily and primarily expressed on T cells,
	NK-T cells, and at different levels on thymocytes during T cell differentiation. CD3 is composed of CD3 $\epsilon$ , $\delta$ , $\gamma$ and $\zeta$ chains. It forms a TCR complex by associating with TCR $\alpha/\beta$ or $\gamma/\delta$ chains. CD3 plays a critical role in TCR signal transduction, T cell activation, and antigen recognition by binding the peptide/MHC antigen complex.

Conjugation: Elab Fluor<sup>®</sup> Red 780

Elab Fluor<sup>®</sup> Red 780 is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 770 nm (e.g., a 780/60 nm bandpass filter).

### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is  $0.1-1 \mu g/10^6$  cells in  $100 \mu L$  volume].
