# PE/Cyanine7 Anti-Human CD326/EpCAM Antibody[9C4]

Catalog No.E-AB-F1163HReactivityHumanStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

Alternate Names EpCAM,Ep-CAM,GA733-2,M1S2,M4S1,MIC18,TACSTD1, TROP1

**Uniprot ID** P1642

**Background** CD326 is also known as Ep-CAM, tumor associated calcium signal transducer 1, epithelial cell

surface antigen, epithelial glycoprotein 2, EGP2, adenocarcinoma associated antigen, and TROP1. CD326 is a type I transmembrane protein containing six disulfide bridges and one THYRO domain. This cell surface glycosylated 40 kD protein is highly expressed in bone marrow, colon, lung, and most normal epithelial cells and is expressed on carcinomas of gastrointestinal origin.

Recently, it has been reported that CD326 expression occurs during the early steps of

erythrogenesis. CD326 functions as a homotypic calcium-independent cell adhesion molecule and is believed to be involved in carcinogenesis by its ability to induce genes involved in cellular metabolism and proliferation. CD326 antigen is an immunotherapeutic target for the treatment of

human carcinomas.

#### **Product Details**

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. 9C4 Host Mouse

**Isotype** Mouse IgG2b,  $\kappa$ 

**Reactivity** Human **Application** FCM

**Isotype Control** PE/Cyanine7 Mouse IgG2b, κ Isotype Control[MPC-11] [Product E-AB-F09812H]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# **Fluorophore**

Conjugation: PE/Cyanine7

PE/Cyanine7 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 775 nm (e.g., a 780/60 nm bandpass filter).

### Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

Human colon carcinoma cell line HT29 are stained with PE/Cyanine7 Anti-Human CD326 Antibody (filled gray histogram). Unstained Human colon carcinoma cell line HT29 (empty black histogram) are used as control.
