PE/Cyanine7 Anti-Mouse CD200/OX2 Antibody[OX-90]

Catalog No. E-AB-F1234UH Reactivity Mouse Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM**

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names OX-2 membrane glycoprotein, OX-2, MRC

Uniprot ID O54901

Background CD200 (OX-2 antigen) is a type-1 membrane glycoprotein containing two extracellular Ig-like

> domains. CD200 a highly conserved type I membrane glycoprotein that is expressed on a variety of cell types including thymocytes, some T cells, endothelial and follicular dendritc cells, B

cells, and brain tissue (neurons); but not on NK cells, granulocytes, monocytes, or

macrophages. CD200 costimulates T cell proliferation. It may regulate myeloid cell activity in a variety of tissues. CD200 is the ligand for CD200 receptor (CD200R). The CD200 Receptor is restricted to myeloid cells, and it is believed that its engagement with CD200 results in inhibition and/or downregulation of myeloid cell activity. Blocking of CD200/CD200R interactions

decreases myeloid cell inhibitory thresholds which results in enhanced immune activation.

Product Details

Form Liquid Concentration 0.2 mg/mL Size $25\mu g/100\mu g$ Clone No. OX-90 Host Rat

Isotype Rat IgG2a, κ Reactivity Mouse **Application FCM**

PE/Cyanine7 Rat IgG2a, κ Isotype Control[2A3] [Product E-AB-F09833H] **Isotype Control**

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

A Reliable Research Partner in Life Science and Medicine

Fluorophore

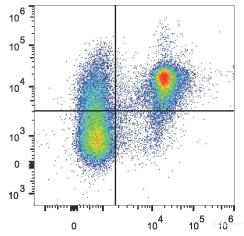

Conjugation: PE/Cyanine7

PE/Cyanine7 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 775 nm (e.g., a 780/60 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 $\mu g/10^6$ cells in $100~\mu L$ volume].

Product data

C57BL/6 murine splenocytes are stained with PE/Cyanine7 Anti-Mouse CD200 Antibody and FITC Anti-Mouse CD45R/B220 Antibody.
