Elab Fluor® Red 780 Anti-Human CD197/CCR7 Antibody[G043H7]

Catalog No.E-AB-F1159SReactivityHumanStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names CMKBR7, EBI1, EVI1, CCR-7, CDw197

Uniprot ID P32248 Gene ID 1236

Background CCR7, also known as CD197, is a chemokine receptor that binds CCL19 and CCL21. CCR7 and

its ligands link innate and adaptive immunity by affecting interactions between T cells and dendritic cells and their downstream effect. Naïve T cells enter the lymph node through high endothelial venules, which express CCL21. Dendritic cells and macrophages enter the lymph node through afferent lymphatics. The encounter of T cells and dendritic cells in the T cell zone is CCR7-dependent. In addition, during immunological surveillance, B cells recirculate between B-cell-rich compartments (follicles or B cell zones) in secondary lymphoid organs, surveying for antigen. After antigen binding, B cells move to the boundary of B and T zones to interact with T-helper cells; this B cell migration is directed by CCR7 and its ligands. CCR7-positive cancer cell

expression has been associated with lymph node metastasis.

Product Details

Form Liquid

Size 20Tests/100Tests/100Tests×2

Clone No. G043H7 Host Mouse

Isotype Mouse IgG2a, κ

Reactivity Human **Application** FCM

Isotype ControlElab Fluor® Red 780 Mouse IgG2a, κ Isotype Control[C1.18.4] [Product E-AB-F09802S]Storage BufferPhosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at $2\sim8^{\circ}\text{C}$ and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

Fluorophore

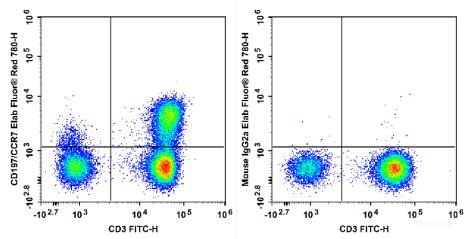

Conjugation: Elab Fluor® Red 780

Elab Fluor[®] Red 780 is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 770 nm (e.g., a 780/60 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Product data

Human peripheral blood lymphocytes are stained with FITC Anti-Human CD3 Antibody and Elab Fluor[®] Red 780 Anti-Human CD197/CCR7 Antibody[G043H7] (Left). Lymphocytes are stained with FITC Anti-Human CD3 Antibody and Elab Fluor[®] Red 780 Mouse IgG2a, κ Isotype Control (Right).
