HNRNPK Polyclonal Antibody

Catalog No. E-AB-60415

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Human,Mouse,Rat
Immunogen	Recombinant fusion protein of human HNRNPK (NP_112552.1).
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Conjugation	Unconjugated
Buffer	PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Applications	Recommended Dilution
WB	1:500-1:2000
IHC	1:50-1:200
IF	1:50-1:200
Data	

Western blot analysis of extracts of various cell lines using HNRNPK Polyclonal Antibody at dilution of 1:1000. **Observed Mw:60kDa**

Calculated Mw:48kDa/50kDa/51kDa

Immunohistochemistry of paraffin-embedded Rat liver using HNRNPK Polyclonal Antibody at dilution of 1:200 (40x lens).

Immunohistochemistry of paraffin-embedded Human esophagus using HNRNPK Polyclonal Antibody at dilution of 1:200 (40x lens).

Immunohistochemistry of paraffin-embedded Mouse esophagus using HNRNPK Polyclonal Antibody at dilution of 1:200 (40x lens).

Elabscience®

Immunofluorescence analysis of MCF-7 cells using HNRNPK Polyclonal Antibody

Preparation & Storage

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Background

This gene belongs to the subfamily of ubiquitously expressed heterogeneous nuclear ribonucleoproteins (hnRNPs). The hnRNPs are RNA binding proteins and they complex with heterogeneous nuclear RNA (hnRNA). These proteins are associated with pre-mRNAs in the nucleus and appear to influence pre-mRNA processing and other aspects of mRNA metabolism and transport. While all of the hnRNPs are present in the nucleus, some seem to shuttle between the nucleus and the cytoplasm. The hnRNP proteins have distinct nucleic acid binding properties. The protein encoded by this gene is located in the nucleoplasm and has three repeats of KH domains that binds to RNAs. It is distinct among other hnRNP proteins in its binding preference; it binds tenaciously to poly(C). This protein is also thought to have a role during cell cycle progession. Several alternatively spliced transcript variants have been described for this gene, however, not all of them are fully characterized.
