

EIF6 Polyclonal Antibody

Catalog Number:E-AB-60458

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human
Immunogen	Recombinant fusion protein of human EIF6 (NP_852133.1).
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Conjugation	Unconjugated
Formulation	PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Applications Recommended Dilution

WB	1:500-1:2000
IF	1:50-1:200

Data

Western blot analysis of extracts of various cell lines using EIF6 Polyclonal Antibody at dilution of 1:1000.

Observed Mw:27kDa
Calculated Mw:23kDa/26kDa

Confocal immunofluorescence analysis of Hela cells using EIF6 Polyclonal Antibody at dilution of 1:50. Blue: DAPI for nuclear staining.

Confocal immunofluorescence analysis of U-2OS cells using EIF6 Polyclonal Antibody at dilution of 1:50. Blue: DAPI for nuclear staining.

Immunofluorescence analysis of MCF-7 cells using EIF6 Polyclonal Antibody

Preparation & Storage

Storage Store at -20°C. Avoid freeze / thaw cycles.

Background

Hemidesmosomes are structures which link the basal lamina to the intermediate filament cytoskeleton. An important functional component of hemidesmosomes is the integrin beta-4 subunit (ITGB4), a protein containing two fibronectin

type III domains. The protein encoded by this gene binds to the fibronectin type III domains of ITGB4 and may help link ITGB4 to the intermediate filament cytoskeleton. The encoded protein, which is insoluble and found both in the nucleus and in the cytoplasm, can function as a translation initiation factor and prevent the association of the 40S and 60S ribosomal subunits. Multiple non-protein coding transcript variants and variants encoding two different isoforms have been found for this gene.
