# **SOD3 Polyclonal Antibody**

Catalog Number: E-AB-65547

Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### **Description**

Reactivity Human, Mouse, Rat

**Immunogen** Recombinant fusion protein of human SOD3 (NP\_003093.2).

Host Rabbit
Isotype IgG

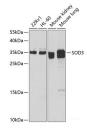

Purification Affinity purification
Conjugation Unconjugated

**Formulation** PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

### **Applications Recommended Dilution**

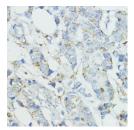

WB 1:500-1:2000 IHC 1:50-1:200

#### Data

Western blot analysis of extracts of various cell lines using SOD3 Polyclonal Antibody at dilution of

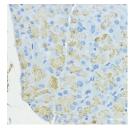

Observed Mw:35kDa Calculated Mw:25kDa

Immunohistochemistry of paraffin-embedded Human mammary cancer using SOD3 Polyclonal Antibody at dilution of 1:100 (40x lens).

Immunohistochemistry of paraffin-embedded Rat ovary using SOD3 Polyclonal Antibody at dilution of 1:100 (40x lens).

Immunohistochemistry of paraffin-embedded Mouse pancreas using SOD3 Polyclonal Antibody at dilution of 1:100 (40x lens).

### **Preparation & Storage**

**Storage** Store at -20°C. Avoid freeze / thaw cycles.

### **Background**

This gene encodes a member of the superoxide dismutase (SOD) protein family. SODs are antioxidant enzymes that catalyze the conversion of superoxide radicals into hydrogen peroxide and oxygen, which may protect the brain, lungs,

and other tissues from oxidative stress. Proteolytic processing of the encoded protein results in the formation of two distinct homotetramers that differ in their ability to interact with the extracellular matrix (ECM). Homotetramers consisting of the intact protein, or type C subunit, exhibit high affinity for heparin and are anchored to the ECM. Homotetramers consisting of a proteolytically cleaved form of the protein, or type A subunit, exhibit low affinity for heparin and do not interact with the ECM. A mutation in this gene may be associated with increased heart disease risk.
