# Elab Fluor® 488 Anti-Human CD107a/LAMP-1 Antibody[H4A3]

**Catalog No.** E-AB-F1149L **Reactivity** Human **Storage** Store at 2~8°C, Avoid freeze / thaw cycles **Applications** FCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

Alternate Names Lysosome-Associated Membrane Protein 1, LGP-120, LAMP-1

Uniprot ID P11279 Gene ID 3916

**Background** CD107a, also known as Lysosome-Associated Membrane Protein 1 (LAMP-1) or LGP-120, is a

110-140~kD type I membrane glycoprotein. Mature CD107a is heavily glycosylated from a 40~kD core protein. This molecule is located on the luminal side of lysosomes. Upon activation, CD107a

is transferred to the cell membrane surface of activated platelets, activated lymphocytes,

macrophages, epithelial cells, endothelial cells, and some tumor cells. CD107a has been suggested to play a role in the protection of lysosomal membrane from lysosomal hydrolases which is involved in cell adhesion and regulation of tumor metastasis, and mediates autoimmune disease progression. CD107a is a ligand for galaptin and E-selectin. Surface expression of LAMP-1 has

been shown to correlate with CD8+ T cell and NK cell cytotoxicity.

#### **Product Details**

Form Liquid

Size 20Tests/100Tests×2

Clone No. H4A3 Host Mouse

**Isotype** Mouse IgG1,  $\kappa$ 

**Reactivity** Human **Application** FCM

**Isotype Control Storage Buffer**Elab Fluor® 488 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792L]

Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# **Fluorophore**

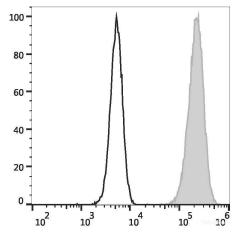

Conjugation: Elab Fluor® 488

Elab Fluor  $^{\$}$  488 is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 520 nm (e.g., a 525/40 nm bandpass filter).

## Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

Intracellular staining of Jurkat cells with Elab Fluor<sup>®</sup> 488 Anti-Human CD107a/LAMP-1 Antibody (filled gray histogram) or Elab Fluor<sup>®</sup> 488 Mouse IgG1, κ Isotype Control (empty black histogram).
