

SARS-CoV-2 NSP8 Polyclonal Antibody(2019-nCoV)

Catalog Number:E-AB-V1041

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	SARS-COV2
Immunogen	Recombinant SARS-CoV-2 NSP8
Host	Rabbit
Isotype	IgG
Conjugation	Unconjugated
Formulation	PBS, pH7.4, containing 0.05% proclin300, 50% glycerol.

Applications Recommended Dilution

ELISA	1:4000~1:8000
--------------	---------------

Preparation & Storage

Storage	Store at -20°C. Avoid freeze / thaw cycles.
----------------	---------------------------------------------

Background

Cleavage by the viral main protease, 3CLpro results in generating the nsp8 protein, The nsp8 protein has been shown to associate with several other nsps and to colocalize with these nsps in cytoplasmic complexes that are important for viral RNA synthesis. It forms a hexadecamer with nsp7 (8 subunits of each) that may participate in viral replication by acting as a primase. Alternatively, may synthesize substantially longer products than oligonucleotide primers. Nsp8 was shown to have RNA-dependent RNA polymerase (RdRp) activity that could be involved in producing primers utilized by nsp12 which is normally accepted to be the RdRp for SARS-CoV.
