FITC Anti-Human/Mouse KLRG-1 Antibody[2F1]

Catalog No. E-AB-F1273UC Reactivity Human, Mouse

Storage Store at 2~8°C, Avoid freeze / thaw cycles **Applications FCM**

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names MAFA, 2F1-Ag **Uniprot ID** Q96E93,O88713 Gene ID 10219,50928

Background Killer cell lectin-like receptor G1 (KLRG1) is the mouse homolog of the rat mast cell function-

associated antigen (MAFA or 2F1-Ag). KLRG1 is a type II membrane glycoprotein that was first identified on the surface of rat mast cell line RBL-2H3. It is composed of a homodimer of glycosylated 30-38 kD subunits. Mouse and human homologs of KLRG1 are expressed by subsets of NK cells and lymphokine-activated killer (LAK) cells but not mast cells. KLRG1 is also expressed on subsets of CD8+ and CD4+ cells, including CD4+ and CD8+ effector/memory

cells, potent regulatory CD4+ T cells. KLRG1 may be involved in regulating NK cell

homeostasis. KLRG20 was found to recognize cadherins and thus inhibit immune responses by

regulating the effector function and the developmental processes of NK and T cells.

Product Details

Form Liquid 0.5 mg/mL Concentration 25µg/100µg Size

Clone No. 2F1

Host Syrian Hamster Syrian Hamster IgG **Isotype** Human, Mouse Reactivity

Application FCM

Isotype Control FITC Syrian Hamster IgG Isotype Control[SHG-1] [Product E-AB-F09763C]

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping Biological ice pack at 4 °C Stability & Storage Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

Fluorophore

Conjugation: FITC

FITC is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 530 nm (e.g., a 525/40 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 $\mu g/10^6$ cells in $100~\mu L$ volume].
