## **Antigen Information**

Alternate Names Macrosialin
Uniprot ID P34810
Gene ID 968

**Background** CD68 is a 110 kD glycoprotein, also known as macrosialin, belonging to the sialomucin family. It

is closely related to the family of acidic, highly glycosylated lysosomal-associated membrane

proteins (LAMPs). CD68 is predominately expressed in cytoplasmic granules of

monocytes/macrophages, dendritic cells, and granulocytes. It is one of the useful myeloid cell markers. Further studies have shown that CD68 is also expressed by a subset of hematopoietic progenitors,  $\gamma/\delta$  T cells, NK cells, LAK cells, subset of B cells, fibroblasts, and endothelial cells.

The biological function of CD68 is still unknown.

# **Fluorophore**

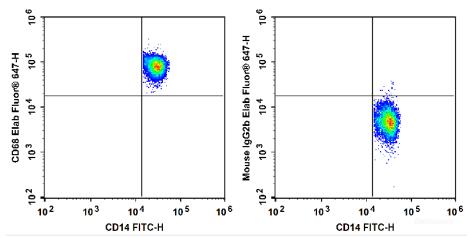

Conjugation: Elab Fluor® 647

Elab Fluor $^{\odot}$  647 is designed to be excited by the Red laser (627-640 nm) and detected using an optical filter centered near 670 nm (e.g., a 660/20 nm bandpass filter).

## Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
