

Recombinant Fas Monoclonal Antibody

Catalog Number:E-AB-81556

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human
Immunogen	A synthetic peptide of human Fas
Host	Rabbit
Isotype	IgG
Clone	R02-8I7
Purification	Affinity Purified
Conjugation	Unconjugated
Formulation	50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% Sodium azide and 0.05% protective protein

Applications Recommended Dilution

WB	1:500-1:1000
IHC	1:50-1:100

Data

Western blot detection of Fas in HeLa, Jurkat cell lysates using Fas Rabbit mAb(1:500 diluted). Predicted band size:38kDa. Observed band size:45kDa.

Observed Mw:45kDa
Calculated Mw:38kDa

Immunohistochemistry of Fas in paraffin-embedded Human lung cancer tissue using Fas Rabbit mAb at dilution 1:50

Preparation & Storage

Storage Store at -20°C. Avoid freeze / thaw cycles.

Background

FAS, also named as CD95, APO-1, APT1, FAS1 and TNFRSF6, is a receptor for TNFSF6/FASLG. It is a cell surface receptor belonging to the TNF receptor superfamily, can mediate apoptosis by ligation with an agonistic anti-Fas antibody or Fas ligand. Stimulation of Fas results in the aggregation of its intracellular death domains, leading to the formation of the death-inducing signaling complex (DISC). FAS-mediated apoptosis may have a role in the induction of peripheral tolerance, in the antigen-stimulated suicide of mature T-cells, or both. The secreted isoforms 2 to 6 block apoptosis (in vitro). This anti-Fas monoclonal antibody can be used to induce apoptosis in cell cultures through Fas by imitating the Fas-ligand.
