# **Elabscience**®

# Elab Fluor<sup>®</sup> Violet 450 Anti-Human CD127/IL-7RA Antibody[A019D5]

Catalog No.E-AB-F1152QStorageStore at 2~8°C, Avoid freeze / thaw cycles

ReactivityHumanApplicationsFCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

### **Antigen Information**

| Alternate Names   | Interleukin-7 receptor subunit alpha,IL-7RA,CDw127,CD127,IL-7Rα  |
|-------------------|--|
| Alter nate Maines | interedkin-7 receptor subunit alpha,iL-7KA,CDw127,CD127,iL-7KG   |
| Uniprot ID        | P16871   |
| Gene ID           | 3575   |
| Background        | CD127 is a 60-90 kD type I transmembrane glycoprotein also known as IL-7 receptor $\alpha$ chain or                    |
|                   | IL-7R $\alpha$ . It forms a heterodimer with the common $\gamma$ chain ( $\gamma c$ or CD132) which is shared with the |
|                   | receptors for IL-2, IL-4, IL-9, IL-13, IL-15, and IL-21. CD127 is expressed on immature B cells                        |
|                   | through early pre-B stage cells, thymocytes (except CD4/CD8 double positive thymocytes),                               |
|                   | peripheral T cells, and bone marrow stromal cells. CD127 has been reported to be a useful marker                       |
|                   | for identifying memory and effector T cells. Studies have shown that CD127 expression is down-                         |
|                   | modulated on Treg cells. It can be used as a marker for differentiation of Treg and conventional T                     |
|                   | cells. The ligation of IL-7 with its receptor is important for stimulation of mature and immature T                    |
|                   | cells as well as immature B cell proliferation and development.  |

#### **Product Details**

| Form                | Liquid   |
|---------------------|--|
| Size                | 20Tests/100Tests/100Tests×2  |
| Clone No.           | A019D5   |
| Host                | Mouse  |
| Isotype             | Mouse IgG1, ĸ  |
| Reactivity          | Human  |
| Application         | FCM  |
| Isotype Control     | Elab Fluor <sup>®</sup> Violet 450 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792Q] |
| Storage Buffer      | Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.      |
| Shipping            | Biological ice pack at 4 °C  |
| Stability & Storage | Keep as concentrated solution.   |
|                     | Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.                     |
|                     | This product is guaranteed up to one year from purchase.   |

#### **For Research Use Only**

# **Elabscience**®

## Fluorophore

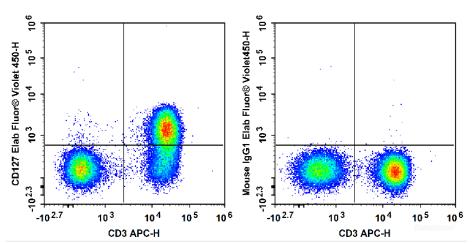

Conjugation: Elab Fluor<sup>®</sup> Violet 450

Elab Fluor<sup>®</sup> Violet 450 is designed to be excited by the violet laser (405 nm) and detected using an optical filter centered near 450 nm (e.g., a 450/45 nm bandpass filter).

### **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

### **Product data**

Human peripheral blood lymphocytes are stained with APC Anti-Human CD3 Antibody and Elab Fluor<sup>®</sup> Violet 450 Anti-Human CD127/IL-7RA Antibody (Left). Lymphocytes are stained with APC Anti-Human CD3 Antibody and Elab Fluor<sup>®</sup> Violet 450 Mouse IgG1, κ Isotype Control (Right).
