

Elab Fluor® 647 Anti-Mouse CD150/SLAM Antibody[TC15-12F12.2]

Catalog No.	E-AB-F1177UM	Reactivity	Mouse
Storage	Store at 2~8°C, Avoid freeze / thaw cycles	Applications	FCM

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Antigen Information

Alternate Names	Slam,Slamf1,CD 150,Signaling lymphocytic activation molecule
Uniprot ID	Q9QUM4
Gene ID	27218
Background	CD150 is a 75-95 kD member of the immunoglobulin superfamily, also known as SLAM (signaling lymphocyte activation molecule) or IPO-3. CD150, a single chain type I transmembrane molecule, is expressed on thymocytes, T cell subsets, B cells, dendritic cells, and endothelial cells. The expression is upregulated upon activation. CD150 expression has been shown to be maintained on Th1 but not Th2 clones. T regulatory cells express a relatively high level of CD150. Antibodies against CD150 have been shown to augment IFN- γ production by Th1 cells, especially when co-stimulated through the TCR. CD150 associates with the src homology 2-domain-containing protein tyrosine phosphatase SHP-2, and this association is thought to be involved in signal transduction. In combination with CD48, CD150 is a useful marker for hematopoietic stem cell studies.

Product Details

Form	Liquid
Concentration	0.5 mg/mL
Size	25 μ g/100 μ g
Clone No.	TC15-12F12.2
Host	Rat
Isotype	Rat IgG2a, λ
Reactivity	Mouse
Application	FCM
Isotype Control	Elab Fluor® 647 Rat IgG2a, λ Isotype Control[B39-4] [Product E-AB-F09742M]
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Shipping	Biological ice pack at 4 °C
Stability & Storage	Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light.Do not freeze. This product is guaranteed up to one year from purchase.

For Research Use Only

Fluorophore

Conjugation: Elab Fluor® 647

Elab Fluor® 647 is designed to be excited by the Red laser (627-640 nm) and detected using an optical filter centered near 670 nm (e.g., a 660/20 nm bandpass filter).

Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 µg/10⁶ cells in 100 µL volume].

Product data

C57BL/6 murine splenocytes are stained with FITC Anti-Mouse CD45R/B220 Antibody and Elab Fluor® 647 Anti-Mouse CD150 Antibody (Left). Splenocytes are stained with FITC Anti-Mouse CD45R/B220 Antibody and Elab Fluor® 647 Rat IgG2a, λ Isotype Control (Right).
