## PE Anti-Rat CD161 Antibody[3.2.3]

Catalog No.E-AB-F1307DReactivityRatStorageStore at 2~8°C, Avoid freeze / thaw cyclesApplicationsFCM

**Important Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## **Antigen Information**

Alternate Names NKR-P1, CD161a/CD161b, NKR-P1a/KLRB1a

Uniprot ID P27471,A4KWA1,Q5NKN4,Q5NKN2

**Gene ID** 362443

**Background** CD161 is a 30 kD type II transmembrane C-type lectin, expressed as a homodimer. Rat NKR-P1

receptors are primarily expressed on NK cells, a subset of T cells, dendritic cells, and activated monocytes. There are three different types of NKR-P in rat, namely NKR-P1a, NKR-P1b, and NKR-P1c. NKR-P1a does not contain an ITIM structure and is an activating receptor, while NKR-P1b contains an ITIM and displays inhibitory function. LLT-1 (ligand lectin like transcript 1) is

the ligand, while KLR (killer cell lectin like) functions as a receptor.

#### **Product Details**

Form Liquid

Size 50Tests/100Tests/100Tests×2

Clone No. 3.2.3 Host Mouse

**Isotype** Mouse IgG1,  $\kappa$ 

**Reactivity** Rat **Application** FCM

**Isotype Control** PE Mouse IgG1, K Isotype Control[MOPC-21] [Product E-AB-F09792D]

**Storage Buffer** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping** Biological ice pack at 4 °C **Stability & Storage** Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light.Do not freeze.

This product is guaranteed up to one year from purchase.

# A Reliable Research Partner in Life Science and Medicine

# **Fluorophore**

#### Conjugation: PE

PE is designed to be excited by the Blue (488 nm), Green (532 nm) and Yellow-Green (561 nm) lasers and detected using an optical filter centered near 575 nm (e.g., a 585/42 nm bandpass filter).

## **Recommended usage**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

#### **Product data**

Rat splenocytes are stained with APC Anti-Rat CD3 Antibody and PE Anti-Rat CD161 Antibody (Left). Splenocytes are stained with APC Anti-Rat CD3 Antibody and PE Mouse IgG1, κ Isotype Control (Right).
